Use this product identifications palette as an example for correctly inquire.

For example encoders   Baumer
Passion for Sensors

Many items like Siemens parts, joysticks, encoders and others, the part number tells you what it is but not what options where added. With the serial numbers the makers can identify this.

Application:

- Insuring the correct part is offered , less errors and reclamations.
- Serial numbers for optional components.
- Alternative or replacement parts for obsolete parts.
- Finding the original maker – save money.
